Conduit Entry Openings in Cabinet Bottoms or Tier Tops

KEY FEATURES:

One 3 in. diameter cable entrance hole is provided in each 26in. wide unit cabinet bottom as standard; see photo on left above.

Two 3 in. diameter holes are provided in each 48in. wide cabinet bottom as standard; see photo on above right. Note: cabinet as shown has a 12in. cabinet extension option added to rear back.

For overhead flexible conduit, you may want to remove your consoles monitor tier tops to field cut the appropriate size holes to add flex cable as shown in photo at lower right.

Keep in Mind:
All console monitor tiers are provided with vertical end frames and horizontal monitor supports with integral divided wireways for separation of power & control wiring.

Conduit Entry - Cable Raceway, End Plugs or Conduit Box

- - - More Control Console Conduit Entrance Options - - -

KEY FEATURES:

26in. wide units have one cable grommet entrance located at center back of the worksurface; 48in. units have two grommets.

Any of these grommet entrances can be used to land the addition of a cable raceway from an overhead feed; see far left for an example.

You can also punch conduit entrance holes in the plastic horizontal wireway end plugs; see upper right - use care not to scratch the paint.

Or, let us factory mount a conduit box on the end of the console.
